

# VisitScotland iCentre locations

Description

Three maps were produced to show the locations of VisitScotland’s various categories of information centres. This is an extract from a map that shows the location of their core sites and their VIP sites. It was presented as an A3 PDF with the intention of being used on-screen and printed. As the map is small-scale and the VIP sites are often closely-located, a multiply blend mode has been used to depict the density and better represent overlaps.
