

Benali's Big Race

URL goes.in.here.co.uk

Description

In October 2016 Southampton Football Club legend Francis Benali ran and cycled to all 44 English Premier League and Championship clubs in aid of raising money for Cancer Research UK. Ordnance Survey supported the challenge by providing help with all the routing information required for Franny and the team to successfully navigate their way around all 44 stadiums. To help commemorate the challenge and help raise a bit more money the GeoDataViz team created a data visualisation capturing the epic challenge.
